OneStream Solution Delivered

The OneStream XF
Platform

Consolidations

Outcomes

Improved data quality

Dormant & unused entity & account members were removed as part of the transition to OneStream which drove improved report & data quality

Enhanced close process

OneStream close steps & process provides transparency for all users to see progress & status during the close period

Reporting Insights

The creation of additional views of data at various FX rates fulfilled managements requirements for enhanced analysis & reporting capabilities

Cash flow automation

OneStream functionality & business rules were leveraged to automate initial calculations in preparation of Cash Flow

Streamlined upgrade process

Transitioning to OneStream enables our client to upgrade to future versions in a more efficient fashion with less downtime & admin intervention
